

TITLE OF THE INVENTION
EOSINOPHIL EOTAXIN RECEPTOR

ABSTRACT OF THE DISCLOSURE

5 The eosinophil eotaxin receptor has been isolated, cloned
and sequenced. This receptor is a human β -chemokine receptor and has
been designated "CC CKR3". The eosinophil eotaxin receptor may be
used to screen and identify compounds that bind to the eosinophil
eotaxin receptor. Such compounds would be useful in the treatment and
10 prevention of atopic conditions including allergic rhinitis, dermatitis,
conjunctivitis, and particularly bronchial asthma.
